From healthcare environments that demand strict hygiene to high-traffic industrial and commercial spaces, ***Dr. Schutz Permanent Coating System*** delivers unmatched ***durability, safety, and sustainability.***

Waxnomor

one-coat application | high coverage

A resilient, 2-component polyurethane coating designed for durability and efficiency. Perfect for floors that need to withstand heavy daily use, Waxnomor resists chemicals and wear — keeping floors cleaner and stronger for years.

Marknomor

stain & chemical resistance

Blocks plasticizer migration from tires, resists dyes, and stands up to harsh environments. Ideal for salons, dealerships, care facilities, and chemical storage areas, Marknomor ensures floors stay protected, with optional slip-resistant additives for increased safety.

Vibrobac

proven effective for 5+ years

Delivers continuous protection against germs using only light, air, and moisture. Reduces bacteria and viruses on floors by up to 99.9% — without biocides, metals, or nanoparticles. Vibrobac closes hygiene gaps in hospitals, nursing homes, and healthcare spaces, keeping patients and staff safer every day.

Permanent Coatings

resists stains & abrasions

Provide the ultimate floor defense — sealing joints and cracks to block bacteria. With over 600 million sq. ft. of floors protected worldwide, these coatings are trusted by leading manufacturers and facility managers alike.

Sustainability & Cost Savings

Restoring instead of replacing floors, prevents 20,000+ tons of non-recyclable waste annually, cuts maintenance costs by over 50%, and saves up to 80% in water use. Resulting in cleaner facilities, lower operating costs, and a smaller environmental footprint.

Proven. Permanent. Protective.

With Dr. Schutz, you get more than coatings — you get long-term performance, hygiene, and sustainability built into every floor.
